ABSTRACT

The purpose of this report is to assess the student's satisfaction with the college's academic offerings, services, facilities, policies, and practices in Waukesha Technical College and the results may be used to quide college wide and department improvement efforts. The questionnaire was administered to students in 125 courses and 1,451 forms were analyzed. The following are some of the key findings of the report: (1) the WCTC students used parking facilities, cafeteria/food services, student health services, and job placement services more often than the normative group; (2) "courses of interest" is the number one reason that WCTC students elected to enroll at WCTC followed by "could work while attending" and "convenient location"; (3) when asked, "If you could start college over, would you choose to attend the WCTC?" about 64% said probably and definitely in 1999 and 2002; and (4) 78% of WTCC students rate the overall quality of education and either good or excellent. The data indicates that when the WCTC makes an effort to make improvements to its services, facilities and processes, students take notice. The document provides tables and graphs that chart the ratings on the college in 1999 and 2002. Contains numerous graphs and tables. (MZ)

Introduction

Part I 2002 Graphical Comparison of WCTC Students and National Norms 2002 Results

Part II Additional Questions

Part III Comparison between the 2002 and 1999 Studies

Student Opinion Survey Administered November 2002

Introduction

Purpose

The ACT Student Opinion Survey questionnaire, also referred to as the "Student Climate Survey" was designed to assess students' satisfaction with the college's academic offerings, services, facilities, policies, and practices. The results may be used to guide college-wide and department improvement efforts. The same questionnaire was administered to students in 1999; therefore, in addition to being able to compare how our students' opinions differ from those attending other two-year technical and community colleges, we are able to compare how our students' perceptions have changed over three years.

Method

The questionnaire was administered to students during the week of November 3, 2002, which was the same time frame as the 1999 study. Students representing a stratified sample of 127 daytime and evening credit classes across all academic program areas were selected to be surveyed, including those enrolled in ATC and Apprenticeship courses. Attention was made to select courses spanning all program semesters. Surveys were returned representing 125 courses; a total of 1,451 forms were submitted for analysis.

Students were asked to indicate whether they used a list of services and to rate the quality of those services on a 5 point scale where 1 represents very dissatisfied, 3 is neutral and 5 indicates very satisfied. The same scale was used for various aspects of the college environment (i.e., academic, admissions, registration, policies, facilities, registration, and the general environment). This year's survey also included 29 additional questions developed by WCTC staff to assess a variety of pertinent issues that were not included in the standard ACT instrument. Students were encouraged to make comments and suggestions for improving the college at the end of the form.

Prior to sending the forms to the ACT Educational and Social Research company, WCTC's Research and Evaluation Services classified staff typed the student comments omitting every name that referenced a staff person; however, names of departments, services and staff occupational titles were maintained.

The ACT company scanned the forms and analyzed the 2002 survey data. The company generated four statistical reports: a graphical summary and a statistical summary of student characteristics and their satisfaction ratings; a report of statistical comparisons between WCTC and other two-year colleges (normative data); and a detailed analysis of the findings broken down by a number of factors (i.e., program area of study; full-time/part-time enrollment status; ethnic background; G.P.A., etc.).

Results

This report includes four sections of results.

- The remainder of this Introduction summarizes key differences between WCTC students and the national comparison group (norms), including the results for some questions that are not presented in later parts of the report.
- Part I prepared by ACT, presents a graphical comparison of WCTC and national student characteristics and their satisfaction ratings for most questions included in the 2002 study.
- Part II presents the responses to the additional questions developed by WCTC staff.
- Part III presents comparisons between our 1999 and 2002 survey administration and indicates where statistically significant differences exist between the 2002 WCTC sample and the national norms.

WCTC 2002 Sample Characteristics

There are a number of differences in the characteristics between WCTC students and the national sample of students representing two-year public and private technical and community colleges; differences which could account for some of the disparity in their perceptions. Some of these differences are presented graphically in Part I of this study.

AGE	The WCTC sample includes f	ewer students 19 or u	nder (20%) than the
			40.04.41.41

national sample (29%) and more students (21%) ages 40-61 than the

national sample (11%).

ETHNIC The WCTC sample includes fewer (2%) African Americans than the

national group (12%) and more white Caucasians (84% versus 70%).

GENDER WCTC includes a better balance of males (53%)/females (47%) than the

national group males (39%)/ females (60%).

MARITAL WCTC's sample has more married students (32% versus 24%). STATUS

ENROLLMENT WCTC has more part-time students (43.3% versus 30% in the national norms).

PROGRAM WCTC has fewer program undecided students (4.1%) than nationally

STATUS (8.6%).

PURPOSE FOR The questionnaire asked students to indicate their primary purpose for entering WCTC. The results have not changed much since 1999. Among the students who were selected for participation in this study (all were enrolled in credit courses), approximately 62% were attending to complete an associate degree or vocational/technical program (see table below). In 1999, our sample included a few students taking

courses at the Waukesha campus.

As seen below, compared to national norms, far fewer WCTC students were planning to transfer to a four-year institution (about 8% for WCTC compared to 35% nationally).

2002	What was your reason for entering WCTC?	1999
%	·	%
2.1	No definite purpose in mind	1.5
3.7	To take a few courses for self-improvement	6.3
6.5	To take a few job-related or job-required courses	8.1
1.6	To take courses necessary for transferring to a 2-year college	1.4
8.2	To take courses necessary for transferring to a 4-year college	7.2
19.0	To complete a vocational/technical program	16.2
10.5	To obtain or maintain a certification	6.4
44.9	To obtain an associate degree	47.9
3.4	Other	4.9

Summary of Key 2002 Findings

Satisfaction ratings compared to national norms

Please refer to Parts I and III for details concerning these summary statements.

SERVICES

WCTC students were statistically less satisfied than the national comparison group (norms) with 9 of 20 college services and more satisfied with 4 of the services. In general, fewer WCTC students use student services.

ACADEMIC

WCTC students were statistically less satisfied with 5 of 12 academic aspects of the college and more satisfied with one aspect (the variety of courses offered). However, it was reassuring to learn that some key academic aspects of the college (e.g., attitude of teaching staff and quality of instruction) were rated as some of the best attributes of WCTC.

PROCESSES WCTC students were statistically less satisfied with 4 of 5 factors related to Rules and Regulations, all 5 aspects of the Admissions process and all 4 aspects of Registration.

FACILITIES

WCTC students were statistically more satisfied with 8 of 10 aspects of our facilities and statistically less satisfied with one aspect (student housing).

GENERAL **ISSUES**

Students were statistically less satisfied with 6 of 8 general climate factors.

Student climate monitoring factors

One of the college's Quality Teams, the Data Team Subcommittee on Student Climate, identified five key aspects of the college to monitor for quality:

- 1) Attitude of the teaching staff toward students
- 2) Attitude of the college non-teaching staff toward students
- 3) Concern for you as an individual
- 4) Overall impression of the quality of education at this college
- 5) Whether students would choose WCTC again, if they were starting over.

The performance targets established for these five monitoring criteria are: Student ratings will be *above* the national norms (50th percentile) **and** will be at 4.0 or above (on a 5 point scale were 4 represents satisfied.)

Although the average student ratings were above 4.0 for two of the monitoring variables, "Attitude of the teaching staff toward students" and "Overall impression of the quality of education at this college," our ranking was not above the 50th percentile (i.e., the national average), and thus we did not reach our target. We also fell short of reaching the target for the three other factors.

Use of College Services

WCTC allocates substantial resources to offering a wide variety of student services. In addition to asking students to rate their satisfaction with a list of college services, the questionnaire asked students whether they *used* each service. The findings revealed a number of statistically significant differences between WCTC students and the normative sample. As briefly mentioned above, in general, WCTC students use services less often than students from other two-year colleges.

WCTC students used these services more often than the normative group:

- Parking Facilities and Services: 81% for WCTC versus 79% nationally
- Cafeteria/Food Services: 55% versus 47%
- Student Health Services: 15% versus 7% (twice as often!)
- Job Placement Services: 11% versus 8%

Our students used these services less often:

- Computer Services: 53% for WCTC versus 61% nationally
- Library/Learning Resources Center Facilities and Services: 52% versus 68%
- Academic Advising/Course Planning Services: 46% versus 59%
- College Orientation Program: 29% versus 37%
- Personal Counseling Services: 11% versus 13%
- Financial Aid Services: 33% versus 51%
- College-Sponsored Social Activities: 8% versus 16% (half as often!)
- Recreational and Intramural Programs and Services: 8% versus 11%
- Student Employment Services: 8% versus 10%
- Cultural Programs and Activities: 6% versus 10%

College-Sponsored Tutorial Services: 7% versus 17%

• Credit by Examination (PEP,CLEP,ETC.): 5% versus 8%

Resident Hall Programs and Services: 4% versus 7%

There were no significant usage differences between WCTC and the national group for these:

• Vocational Guidance/Career Planning Services: 18% for WCTC versus 20% nationally

• Day Care Services: 5% versus 4%

Veterans Services: 5% versus 6%

Comparisons between the 1999 and 2002 studies

The following tables provide comparisons between the 1999 and 2002 survey findings.

The major reason WCTC students elected to enroll at WCTC

As seen in Table 1, "courses of interest" remained the top reason why students came here in both 1999 and 2002, far above all of the other 11 reasons. However, when this data is analyzed by program area and other factors, differences do occur. Since the college allocates considerable resources to recruit students, a detailed discussion of some of those differences follows. (Additional detailed information may be obtained by contacting Research and Evaluation Services.)

Table 1

		3 = Major Reason, 2 = Minor Reason, 1 = Not a Reason		
2002	For each factor, indicate whether it was a major, minor	1999		
Rank	Mean	or not a reason you selected WCTC.	Rank	Mean
1	2.72	Offered the courses I wanted	1	2.72
2	2.28	Could work while attending	2	2.37
3.5	2.21	Convenient location	3	2.24
3.5	2.21	Low cost of attending	4	2.23
5	2.11	Good chance of personal success	5	2.19
6	2.07	Good vocational or academic reputation	6	2.12
7	1.64	Liked the size of the college	7	1.66
8	1.55	Availability of scholarship or financial aid	8	1.41
9	1.44	Like the social atmosphere	9	1.41
10	1.34	Advice of parents or relatives	10	1.37
11	1.27	Advice of high school counselor, teacher, principal	11	1.26
12	1.11	Wanted to be with friends	12	1.11

As mentioned above, having **courses that students want** was the major reason most students (72%) enrolled at WCTC; however, it truly stood out as the reason among those enrolled in Automotive programs (90%) and in Allied Health programs (82%).

WCTC's **convenient location** was more often a major reason for enrolling among students in CIS; Finance, Accounting and Real Estate (FARE); Business, Allied Health and Nursing programs than among students in other programs.

The **low cost** of attending stood out as a major reason for 56% of Nursing program students, but low cost was more often not a reason for students enrolled in Automotive programs.

WCTC's **good academic reputation** was more often a major reason for attending among Nursing (45%) and Automotive students. Our good academic reputation was not a reason for attending for a number of Construction program students (35%).

A **good chance for personal success** stood out as a reason among Allied Health and Automotive program students.

Availability of scholarships was not a reason for most students but rarely a major reason among Fire/Police/EMS and Industrial/Manufacturing students. It was most important for Automotive students.

Advice from parents was typically not a reason for 66% of students, but not a reason for only 45% entering WCTC from high school. Parents and relatives had the biggest impact on Printing and Graphics and Fire/EMS/Police students.

Typically, **advice from high school counselors, teachers and principals** was not a major reason, but these individuals had the biggest impact on Automotive; Printing/Graphics; Fire/Police/EMS and Hospitality/Culinary students.

Wanting to be with friends did not impact students' decision except it was a minor reason for 30% of the Automotive students.

Being able to work while attending school was least important for students enrolled in Automotive and Mechanical Design/Electronics related programs.

Finally, among students entering directly out of high school:

- Offering courses that students wanted and WCTC's good academic reputation were less often reasons for attending, compared to other students;
- · A good chance of personal success and low cost were more often a major reason;
- Availability of scholarship or financial aid was more important to those entering from high school;
- Advice from high school staff played a role in 53% of those in this group.

Other key findings, continued

Among colleges and universities that have competitive entrance requirements, one factor commonly monitored is the number of students attending the college who selected it as their first choice. As seen in Table 2, WCTC was not the first choice of 22% who have been enrolling here.

Table 2

2002	What was your rating of WCTC at the	1999
%	ime you applied for admission?	%
77.8	It was my first choice	78.0
15.7	It was my second choice	15.8
3.8	It was my third choice	3.3
2.7	It was my fourth choice	2.9

A common question used to evaluate customer satisfaction is "Would you use this company's service or product again?" When we asked, "If you could start college over, would you choose to attend WCTC?" about 64% said probably or definitely yes in both 1999 and 2002.

Table 3

20	02	If you could start college over, would you	1999	
wctc	Norms	choose to attend WCTC?	WCTC	Noms
28.2	36.1	Definitely yes	28.2	36.5
36.0	33.3	Probably yes	34.8	34.0
18.8	16.2	Uncertain	21.0	15.9
9.2	7.6	Probably no	8.1	7.3
4.1	4.6	Definitely no	5.0	4.3
3.7	2.2	(blank)	2.9	2.0

Compared to the national norms, fewer WCTC students would *definitely* choose the college again; more were uncertain about what they would do, and just a few more would not choose to come again. While we don't precisely know why WCTC students were uncertain or would not choose to return to WCTC, among that group only 9% had an excellent overall impression of the college. Conversely, among those who would choose WCTC again, 26% had an excellent impression of the college suggesting that overall educational quality was a factor in their decision. When white Caucasians are

compared to other ethnic categories of students, we find no differences between their ratings about whether they would choose to come here again.

Table 4 displays the overall impressions that students have about WCTC. Student perceptions about the overall quality of WCTC have improved since 1999 but are still below the national norms. Very few students (only 44 of 1451) indicated their impression was below average or very inadequate and for 21 of them, WCTC was reportedly not their first choice of colleges to attend.

Table 4

20	02	Overall impression of the quality of		99
wctc	Norms	education at WCTC?	wctc	Norms
26.0	28.8	Excellent	23.3	29.9
51.5	50.3	Good	55.4	50.2
15.8	16.3	Average	15.9	15.8
2.5	1.9	Below Average	2.7	1.6
.6	.6	Very Inadequate	.5	.5
3.7	2.2	(blank)	2.3	2.0

Implications

An overall trend in these findings is that WCTC tends to fall below the national norms when it comes to the use of services and regarding satisfaction with those services and other aspects of the college. This leads us to ask, "Why?"

Interpreting these findings involves comparing our students' ratings with those of over 100,000 students from 158 other two-year colleges. When we compare ourselves only to those colleges that report having *enrollments* over 10,000, a slightly different picture appears—we still tend to fall below the norms for the majority of factors (except facilities and instructional quality), but not quite as far below. In general, but not across the board, students attending larger schools (10,000 or more) tend to rate many but not all of their college services lower than students attending smaller to mid-sized public colleges¹.

This leads one to ask, when we interpret our findings, why don't we just use the norms for colleges over 10,000 students? The problem is, some of the characteristics of students attending those colleges tend to be less like students attending WCTC. Larger colleges tend to be in urban areas and have a much lower proportion of white Caucasian

¹ This trend does not hold true for private colleges and colleges that are very small (less than a headcount of 2,000), probably because they have a limited array of services:

students attending. Hence, it tends to be wiser to compare our students with the total normative sample. But given the fact that students attending large schools tend to rate services and processes lower, one might hypothesize that students attending small to mid-sized colleges feel more connected to other students and college staff, raising their satisfaction level on a number of factors. Another hypothesis is that due to the high volume of students needing services at large colleges, staff working at these institutions are less happy or satisfied with their jobs, and in turn create less happy or satisfied customers.

How can we improve students' perceptions?

The findings suggest that when WCTC makes a concerted effort to make improvements to its services, facilities and processes, students take notice. Additional graphical displays of differences between student ratings in 1999 and 2002 can be seen in Part III. As seen on page 12 of Part III, ratings of the college's facilities have improved considerably since 1999; since then three new buildings have been built and substantial remodeling projects have been completed. The general facility area is the one area where WCTC now consistently compares favorably to the national norms. Also, parking has improved since 1999 and now surpasses norm ratings (see Part III page 6), probably because in 2001/02 the college eliminated staff and reserved parking. Library and Learning Resources also have improved considerably and now surpass national norms. Our Library is now housed in the new College Center building. Similarly satisfaction with the college's Cafeteria/Food Services also have increased and now surpass the national norms, although a substantial number of students commented that food costs are too high.

A note about advising and counseling services

A number of pre-enrollment and counseling related services continue to receive relatively low ratings by our students (see Part I, pages 6-7 and Part III, pages 7-10). Although WCTC initiated an advising program around 1998, it was discontinued as a requirement for most students in 2002/03. It would have been interesting to see if any improvements were perceived if the program was still in effect.

An important thing to consider when interpreting findings related to advising and counseling services is that a wide variety of staff provide these services to students. As seen in Part II, (questions 3-5), 21% of the students indicated that they usually ask instructors for advice when they need *academic advising and course planning* services; 17% said they ask a program counselor; 9% said they ask an academic advisor; 9% ask an associate dean and 23% said they have never needed advising or they figure it out themselves. Similarly, when students need *career planning* services, 9% said they ask Career Center staff; 10% ask a program counselor; 4% ask an associate dean and only 3% said they ask an advisor. Also, when it comes to needing *counseling for personal problems*, students most frequently turn to instructors (4%); 2% ask a program counselor; and 7% ask other WCTC staff. So again, when interpreting the satisfaction ratings for these services, it is important to keep in mind that students turn to a wide variety of staff.

Final comments

This Introduction section could go on much longer summarizing the findings of the standard ACT questionnaire. However, many of the detailed findings relate to specific college departments and subcategories of students² that are not of particular interest to all readers. Those findings can be obtained in the detailed analysis report generated by ACT by contacting Research and Evaluation Services.

Research and Evaluation Services staff will be consulting with individual department staff to discuss those findings in detail and to identify ways that staff might modify or improve their services and instructional delivery to better meet the needs of their students. As alluded to in the first paragraph of this report, the sole purpose of conducting this study was to help guide college improvement efforts.

Also, this Introduction did not interpret the results of the additional questions developed by WCTC staff, nor the 46 pages of student comments generated by the study. Readers are encouraged to study those questions of interest. Many of the additional questions relate to instructional delivery and student outcomes assessment efforts and have implications for our student retention efforts. The student comments have been sorted by department area and will be shared with specific departments, rather than college-wide. Also, student services staff will receive comments related to their sphere of influence.

If you have questions or would like further information about the methods, findings or limitations of this study, please contact Kathy Yindra, Director of Research and Evaluation Services, x 5424 or kyindra@wctc.edu

Author's Acknowledgments

- Sincere gratitude is extended to the many WCTC instructors who modified their class(es) in order to administer this survey to students. Without their cooperation, this information would not be available to help guide college improvements.
- Sincere appreciation is extended to those who served on the steering committee and helped coordinate this project: Ellen Mei, James Dombeck, Karen Aamot, Penny Alt, Rosemarie Verg, Susan Minnick, and Timothy Graham.
- Deep appreciation is extended to Mary Huppertz, Research and Evaluation department secretary for overseeing the survey administration and collection, and for preparing the graphs in Part III of the report.

² Detailed findings are available by program area of study; time entered WCTC (directly or not directly out of high school); full-time/part-time enrollment status; ethnic background; G.P.A. above and below B-; "freshman" status; uncertain or would not choose WCTC again; whether WCTC was or was not the student's first choice; working more than 20 hours per week; and primary time of day attending (daytime or other).

Part II Results for Additional Questions Submitted by WCTC Staff

Additional Questions Results Developed by WCTC Staff

- 1. How many credits of WCTC course work could you afford to take each semester, without receiving financial aid?
 - A. I-4 credits (521/36%)
- B. 5-8 credits (249/17%)
- C. 9-11 credits (131/9%)

- D. 12-14 credits (203/14%)
- E. 15-17 credits (88/6%)
- F. 18+credits (131/9%)
- 2. How many credits of course work could you afford to take each semester if you received financial aid?
 - A. I-4 credits (95/7%)
- B. 5-8 credits (179/12%)
- C. 9-11 credits (143/10%)

- D. 12-14 credits (344/24%)
- E. 15-17 credits (195/13%)
- F. 18+credits (354/24%)
- 3. When you need academic advising/course planning services, who do you usually ask?
 - A. associate dean or program manager (125/9%)
 - B. instructor (298/21%)
 - C. program counselor (240/17%)
 - D. Multi-Cultural Affairs staff (20/1%)
 - E. minority mentor (4/1%)
 - F. academic advisor (for program admitted students) (130/9%)
 - G. Learning Place staff (31/2%)
 - H. other staff (19/1%)
 - students (48/3%)
 - J. family member or friend (57/4%)
 - K. nobody; I figure it out myself (185/13%)
 - L. have never needed academic advising at WCTC 147/10%)
- 4. When you need career planning services, who do you usually ask?
 - A. associate dean or program manager (51/4%)
 - B. program counselor (148/10%)
 - C. Career Center staff at the Workforce Development Center (136/9%)
 - D. Center for Non-Traditional Students staff (Women's or Men's Development Center) (10/1%)
 - E. Multi-cultural Affairs staff (17/1%)
 - F. minority mentor (10/1%)
 - G. academic advisor (38/3%)
 - H. instructor (152/11%)
 - other staff (18/1%)
 - J. family member or friend (116/8%)
 - K. nobody; I work it out myself (262/18%)
 - L. have never needed career planning services at WCTC (362/25%)
- 5. When you need counseling for personal problems, who do you usually ask?
 - A. Instructor (51/4%)
 - B. program counselor (31/2%)
 - C. Career Center staff at the Workforce Development Center (10/1%)
 - D. Student Assistance (AODA) staff (11/1%)
 - E. Center for Non-Traditional Students staff (Women's or Men's Development Center) (13/1%)
 - F. Multi-Cultural Affairs staff (8/1%)
 - G. minority mentor (5/1%)
 - H. academic advisor (8/1%)
 - I. other staff (13/1%)
 - J. family member or friend (383/26%)
 - K. nobody; I figure it out myself (231/16%)
 - L. have never needed counseling for personal problems while at WCTC (554/38%)
